Learning Kotlin: a trial-and-error approach

Evgeny Trushin

https://github.com/evgeny-trushin/Kotlin_trial-and-error_learning

Languages I have used in production environments:

-> MEX for Maximus BBS, 1998
-> Borland Pascal, 2000
-> C, 2001
-> PHP/SQL, 2006
-> JavaScript, 2010
-> Java, 2012
-> Kotlin, 2017

linkedin.com/in/evgeny-trushin/

I have learned plenty of languages and made at least 10,000 coding mistakes in these 20 years.

All the same, I know that the ability to solve problems while coding is the primary skill that separates proficient programming and not programming at all.

The goal of this speech is to present you common coding errors which you may come across while mastering Kotlin.
